PSEG

April 15, 2013

Scott Glosenger
Lehigh Industrial Supply
450 Fairview Ave,
Slatington, PA 18080

Dear Mr. Glosenger,

We would like to send our personal thanks, along with the entire Public Services Enterprise Group, for the tremendous effort that you and your firm provided to PSEG during Superstorm Sandy and its aftermath. Through teamwork and an unprecedented work ethic, we collectively were able to safely restore power to more than 1.7 million PSE&G customers, repair our transmission and delivery systems, and support our communities in the weeks following Superstorm Sandy.

This storm was the most powerful in PSEG's 109 year history - impacting twice as many customers as Hurricane Irene and nearly three times as many as last October's snowstorm. During restoration we repaired more than 2,400 utility poles and worked on 48,000 trees as we accomplished more than 2.1 million electric service restorations – a record for any utility in the country. This was a tremendous all around effort on the part of our colleagues, mutual aid companies, and, especially, our suppliers and service providers.

Your efforts to support PSEG and its customers during these trying times were truly commendable. Thank you for your exceptional support and dedication.

Sincerely,

Robert F. Friend
Vice President Procurement
PSEG Services Corp.
